Objectives

- To cultivate the interest of mathematics of all members
- To develop the logical and critical thinking of our students
- For S.1 students, as they just start learning Mathematics in English,
 we can help them comprehend the contents in textbook
- To help students developing a habit of lifelong learning

Mathematics HKEA Calculator Workshops

- Held in the first school term
- Catered for specific topics of S.2 S.4 classes
- Drill the students to be familiar with the function keys of their HKEA
 Approved Calculators for faster and accurate numerical calculations
- Calculator Programming will be provided and our committee
 members would assist all participants to enter the programs

Mathematics Small-Group Tutorial Classes

- Held in the morning period or after school
- Mainly catered for the less capable students of junior form
- To help our juniors in efficient problem solving for consolidation of subject knowledge and enhancement of their self-confidence
- Details of arrangement will be released in due course

Mathematics Sudoku Competitions

- Held monthly in online format
- Students will receive a form with Sudoku questions
- Submit the question form after solving your Sudoku
- The students who are ranked Top 3 in the total score will be granted Certificates of Merits and/or Prizes
- To help students strengthening their logical thinking skills

Mathematics Online Competitions

- Held bi—weekly
- Students will receive a Google Form with MC questions related to what they have been learnt
- Submit the question form after solving the problems
- The students who are ranked Top 3 in the total score will be granted Certificates of Merits and/or Prizes
- To help students consolidating their subject knowledge

e wish vou a having more interest studvind Mathematics in KTGSS
